

vSpace® Pro Client for Windows® and Chromebook™

Key features & benefits

- Access virtual desktops from any PC or Chromebook from anywhere with a LAN or WiFi connection
- Increase the functionality and value of existing technology
- Deliver a secure and seamless Windows desktop environment for all users, regardless of device
- Reduce administration, upgrade and replacement costs
- Enable schools and businesses to support a BYOD (Bring-Your-Own-Device) policy

Bring a modern Windows desktop to your existing PC or Chromebook deployments with vSpace Pro Client. Once installed, connect to your vSpace Server and enjoy a secure, modern Windows desktop without the expense of switching or upgrading hardware. vSpace Pro Client provides a high-performance PC experience to Chromebooks and PCs. Schools and businesses can leverage new investments in affordable Chromebooks, utilize existing PCs or bring their own devices in a secure, fully managed computing solution for all their Windows applications.

System requirements*

- vSpace Pro Client for Chromebook can be installed on devices running Google® Chrome OS™
- vSpace Pro Client for Windows can be installed on devices running Windows 7 (64-bit), Windows 8.1 (64-bit) or Windows 10 (64-bit)

vSpace Server:

- vSpace Pro Client for Chromebook is supported by vSpace Pro 10
- vSpace Pro Client for Windows is supported by vSpace Pro 10

Recommended minimum hardware requirements:

- Chromebook: 1.4GHz Celeron or 1.8GHz ARM CPU with 2GB DRAM
- Windows device: Intel Pentium 4 CPU with 2GB DRAM.

* Refer to ncomputing.com/support for the latest supported versions

Available to all Windows® and Chromebook™ users, vSpace Pro Client extends user access to a centrally managed, high-performance Windows desktop computing environment without the expense of switching or upgrading hardware.

vSpace Pro Client for Windows enables customers to reach users with remote, mobile or legacy PCs and expand vSpace Server desktop virtualization to any Windows computing device.

vSpace Pro Client for Chromebook enables customers to continue accessing key Windows-only applications as well as web apps utilizing Java or Silverlight, encouraging a hybrid user experience that captures the benefits of both Chrome OS and Windows on one device. Applications that previously could not be supported on a Chromebook now run seamlessly, just like on a PC.

Simple, Powerful and Affordable.

The vSpace Platform allows many different devices to securely access managed virtual desktops from anywhere with a network connection, LAN or WiFi. A users managed desktop can be accessed through vSpace Pro Client from any PC or Chromebook, or on any one of NComputing's low-cost vSpace thin clients. Say goodbye to the panic that ensues with user hardware crashes. Users Windows desktops and applications are managed centrally on vSpace Server, our proprietary virtualization engine. Reliable, efficient and scalable, a single server can support up to 100 concurrent users. Need more users? Add another vSpace Server.

With vSpace Pro Client the 70,000 and growing global customers of NComputing's vSpace Platform have the flexibility to extend and scale their vSpace solution beyond the 5-million plus users, who use their NComputing vSpace thin clients on a daily basis, for their Windows desktops and applications.

Licensing requirements

vSpace Server:

- Concurrent user licenses for each vSpace Server are required for each concurrent user connecting with vSpace Pro Client
- Trial access is included in vSpace Server software at no charge with a 10-minute maximum session time
- Licenses for vSpace Pro Client may be purchased from your reseller or directly through the Management Portal.

vSpace Pro Client software:

- vSpace Pro Client for Windows is free to download and install on Windows devices from www.ncomputing.com/support/software
- vSpace Pro Client for Chromebook is free to download and install on Chromebook devices from the Chrome Web Store. Visit the Chrome web store and search for 'vSpace' or go to: www.ncomputing.com/products/vspaceclient/chrome

3rd party software:

- Application software, client access and OS licenses for the shared PC and client PC may be required by the respective software vendor and must be purchased separately.
- For Microsoft OS licensing information, see www.ncomputing.com/mslicensing

FEATURE	FUNCTION
SUPPORT FOR WINDOWS AND CHROMEBOOK	Allows Chromebook's and Windows PC's to connect to vSpace Server hosts and provide users a high performance PC-like Windows experience
CONNECTS TO VSPACE SERVER	Provides access to NComputing's centralized, managed virtual desktop environments
USER CONFIGURATION PROFILES	Administrator defined user experience settings for server connectivity, failover, audio, video, automatic login
FLEXIBLE CONNECTIVITY OPTIONS	Connect at distance via Ethernet LAN or WiFi
HOST-OPTIMIZED VIDEO ACCELERATION	Automatic video transcoding, streaming and scaling up to 1920x1200 resolution at full frame rates with 24bit color.

A suitably configured vSpace Server can host up to 100 centrally managed Windows desktops that can be accessed by vSpace Pro Client devices.

KEY USE CASES

MOBILITY, BYOD & REMOTE ACCESS

Access Windows applications from PC's or Chromebooks via LAN or WiFi from home or school. Enable students to use their own devices.

REVITALIZE OLD PC HARDWARE

Re-purpose legacy and existing PCs as centrally-managed virtual desktop devices to provide users with a rich new Windows experience.

PUT YOUR STUDENTS FIRST

Enable students to use the technology tools that help them learn best, regardless of platform or quality of Internet connection.

TRANSITION TO THE MANAGED DESKTOP

Move users to virtual desktop computing in manageable steps to achieve incremental benefits.

THE BEST OF WINDOWS AND CHROME OS™ ON THE SAME DEVICE

Use key Windows applications, Java and Silverlight on a Chromebook. Easily switch between Chrome OS and Windows.

STREAMLINE CLASSROOM TECHNOLOGY

Manage your applications and virtual desktop centrally, ensuring a consistent, up-to-date learning experience for all users on the vSpace Server.
